Full Stack Developer with over 5 years of experience in web development, recently completed an internship at Anima People, where I contributed to scalable and high-performing web applications. Transitioning from a **Frontend-focused** background into a **full-stack** role, I applied my skills in **Next.js, React, Tailwind CSS, Node.js, Fastify, Prisma ORM, and PostgreSQL**. Recognized for my **problem-solving** ability, **adaptability**, and **collaborative** approach. Passionate about continuous learning and delivering quality solutions across the entire tech stack.

Work Experience

Full Stack Developer

Full-time • 11/2024 - 05/2025

Anima People

- **Developed a psychometric testing app to evaluate employees and enhance company security.**
Built and optimized the frontend using **Next.js, React**, and **Tailwind CSS**; developed the backend with **Node.js, Fastify, Prisma**, and **PostgreSQL** to create secure, scalable applications that improved both performance and user experience.
- Collaborated with cross-functional teams to design and build scalable APIs, ensuring high performance and security
- Participated in bi-weekly sprints, aligning team efforts to meet project milestones effectively.

Full Stack Developer

Full-time • 06/2024 - 10/2024

School of Code

- **Designed and built a responsive Airbnb-like homepage** using **React.js and Tailwind CSS**, improving UI performance and accessibility.
- **Implemented interactive UI components and managed state efficiently** using **Next.js and React reducers**, enhancing frontend responsiveness.
- **Optimized CI/CD workflows** with **GitHub Actions and Docker**, reducing deployment time and improving DevOps efficiency.
- Implemented Test-Driven Development (TDD) using Vitest, Jest, and Playwright, achieving 95%+ test coverage for frontend components.

Skills

Programming Languages / Database

- JavaScript
- TypeScript
- HTML5
- Cascading Style Sheets (CSS)
- JSON
- SQL
- PostgreSQL

Frameworks / Libraries

- React.js
- Next.js
- Node.js
- Express.js
- Angular
- Tailwind CSS
- Bootstrap
- Content Management Systems (CMS)
- REST APIs
- Vitest
- Redux
- Prisma ORM
- Jest

Tools / Methodology

- Jira
- Agile Methodology
- DevOps
- GitLab
- CI / CD Pipeline
- Microsoft Visual Studio Code
- Figma
- Playwright
- Postman API

- **Deployed scalable web applications** using **AWS (EC2, S3, Lambda)** to ensure high availability and performance.
- Using **React.js, Tailwind CSS, JavaScript, Node.js, Express, Postman, and PostgreSQL**, developed and deployed projects such as,
 - Full-stack Recipe and Dream Catcher app with front-end and back-end integration

Frontend Web Developer

Full-time • 08/2020 - 04/2023

Pearl Organisation

- **Developed a pharmaceutical E-commerce platform from scratch** using **React and Tailwind CSS**, integrating **payment processing, inventory management, and user accounts**.
- **Optimized website performance**, reducing load times by **30%** through efficient asset management and lazy loading.
- **Implemented unit testing** with Jest, ensuring robust functionality and high reliability.
- **Utilized Kanban methodology** and **flowcharts** for structured task management and UI/UX planning.
- **Designed and deployed multiple CMS-based E-commerce websites** using **WordPress & Wix**, enhancing business engagement and sales:
- **Built a restaurant website** with **online ordering & reservations**, increasing customer interaction.
- **Created an e-commerce platform** for an **ice cream factory**, enabling custom orders and bulk purchases, enhancing UX and revenue.

IT Trainer

India • Full-time • 01/2018 - 06/2020

Cyber Radix

- As an IT Trainer at Cyber Radix, I conducted training sessions on web design and development for individuals and groups of students.
- Instructed students on web development using HTML5, CSS, Bootstrap, and JavaScript.
- Provided training in Core Java, C, C++, Core Python and Object-Oriented Design principles, emphasizing practical application and knowledge sharing.

- Cloud Services
- Test Driven Development

Volunteering & Leadership

Qisetna

01/2024 - 06/2024

IT Project Manager

- Created project plans & delegated tasks to the team using JIRA Kanban.
- Reviewed FIGMA designs and guided the development team.
- Monitored Projects progress and present updates to stakeholders.
- Coordinated production releases and roll-outs.

Certifications

Agile Product Owner Role: Foundations

LinkedIn

Agile Project Management with Jira Cloud: 3 Advanced Topics
